Art Unit: 2823

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 8, 9, and 16, are rejected under 35 U.S.C. 102(b) as being anticipated by Ying et al (U.S. Patent 6,187,659).

Ying et al discloses forming a contact plug in a semiconductor device comprising forming a contact isolation region 74 on a substrate 10, the contact isolation layer having an opening 75 exposing a partial portion of the substrate (Figure 6a), depositing a polysilicon conductive layer 76/80 within the opening of the contact isolation layer (Figure 6d), doping dopants in a manner to allow the conductive layer to have different doping distributions with respect to a thickness of the conductive layer (Column 7), and forming a contact plug 82 within the opening through a planarization process applied to the conductive layer (Figure 6e).

Claims 2-7, and 10-15, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
